

Web Engineering
Quiz 14 on Where to go?
July 31, 2018

Name: Yuta Nemoto

ID: 51240234

1. What are the issues with challenges of Web engineering related to the users?

The issues with challenges are that the Users are generally unknown. Especially at the development, behavior patterns are not known and it gives more difficulty to design interface.

2. Which trend on the WEB is more challenging from your point of view?

From my point of view, challenging trend on the Web is the appearance of more highly-developed technologies.

3. Where should ITTY BITTY apps be hosted?

It's not actually hosted anywhere. The entirety of the webpage exists as a URL compressed using the Lempel-Ziv-Markov chain algorithm.
