

Web Engineering
Quiz 9 on Finding your way around Rails
July 13, 2018

Name: Yuta Nemoto
ID: S1240234

1. What should you run to create the code for the application named *questionnaire*?

rails new questionnaire

2. Please list the possible Rails environments?

- Development
- Test
- Production

3. What would be the names for the database table and for the class definition file related to the PurchaseOrder class? What is the name of the directory for location of this file?

(For the database table names, such as variable names, are all lower case, words are separated by underscores, and table names are always plural.)

□ For the database table ... purchase_orders

□ For the class definition file ... purchase_order.rb

location ... in the app/models/ directory
