Quiz 13 on Universal Design for Web Applications: Google's Approach

July 27, 2018

Name: Yuta Nemoto

ID: 51240234

1. What is the definition of universal design?

Universal design is the design of products and environments to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design.

2. What is the user view on the Google App Engine technology?.

When you write a Google Application Engine Application - you are running in the Google Cloud

Just like you were a Google Developer

You don't know where you're running or if one copy of a thousand copies of you are running

3. What is the meaning of auto-update issue?

If an application auto-updates is there a way for a person to control the frequency of updates?
