store_controller.rb

1. What should you add to the ~~product~~.rb file to display all products in alphabetical order?

   Should add the line "@products = Product.order(:title)" to the index method in the store_controller.rb.

2. How to add the $ sign to the prices?

   There is a number_to-currency helper method to format prices. To use this, the line in the html.erb file
   "<%= product.price %>"
   should be changed to
   "<%= number_to_currency(product.price) %>"

3. What are *assert_select* statements responsible for?

   assert_select performs varies base on the type of the second parameter:
   • A number is treated as a quantity
   • A string is treated as an expected result
